

## Floor Cleaning Process

### Clinic Floors In The Evening:

- Sweep or vacuum in corners, around baseboards, under moveable items, & on base of chairs/stools
- The team member that is responsible for wiping down chairs, phones, keyboards etc. will also wipe down the stand and base of chairs using Got Pee or Windex on all stainless steel. Rescue is ok if the surface is plastic.
- Put Wet Floor sign out.
- iMop the following areas: lobby, front room, client bathroom, each exam room, exam room hallway, treatment area, treatment hallway, training area, xray, staff bathroom, xray
- Use a towel to dry up any puddles
- If used that day, iMop: critical care, treatment runs, surgery
- Pick up Wet Floor sign the next morning

### Floors of Exam Rooms In Between Appointments:

- Clean corners & under moveable item for dust bunnies
- Clean any blood, cheese, urine, fecal, anal glands with Rescue or Got Pee
