# NORMAL PRE-ANESTHETIC DIAGNOSTICS RESULTS PROCESS

- 1) Go into **Exam** from Groups and click the pencil to open NURSE VISIT under Plan go to “Treatments and Diagnostics Performed” type UPDATE POST LAB RESULTS: all bloodwork wnl (or any other notes you have) and the doctor’s initials. Press save and release.
- 2) **Email** the family using the template, by choosing the blue quick link Email Client, then choose the pet from the drop down and “normal pre-anesthetic bloodwork” from the template drop down. Press send - no changes need made unless doctor has advised special notes to be added.
- 3) Place the printed out bloodwork in the metal file box next to back treatment computer station so that vet assistant can put it on the patient’s clipboard on anesthesia day
