

PVP Packages

Car Ride First Visit Stress, PVPs, Anesthesia Prep

First Visit Stress Reducer Kit (code **firstvisitstress**) - This populates the Fear Free FAQ handout (see attached) that you should print and put in bag with the kit as well as email to the owner. Remove Feliway Wipes for dogs, remove Adaptil spray for cats. For dogs, the melatonin dose is as follows and on the prepopulated drug label for melatonin.

Pre-Visit Fear Free Anxiety Relief (code **pvvisit**)- This populates the Fear Free FAQ handout AND you must "generate patient document" the PVP instructions sheet so that it is customized to this specific pet. I.E> if pets are going home with this PVP package they get 2 handouts. You will see that this package now only has one kind of each medication. This is so that you are reminded of the kinds to choose from but do not have to delete so many. We are no longer doing a one size fits all package fee. The owner will pay for the individual medications and be given a \$10 discount to thank them for helping us protect their pet's emotional wellbeing. Simply remove the medications not going home and add any that you need.

HRVSS Pre-surgical Preparation Medications (code **hrvsspp**) - This populates the Fear Free FAQ handout (see attached) that you should print and put in bag with the kit as well as email to the owner. Choose medications that go home based on HRVSS protocol.

HPVC Elective Surgery Preparation Medications (anesprepcan2021 or anesprepfel2021) - This populates the Fear Free FAQ handout (see attached) that you should print and put in bag with the kit as well as email to the owner. Choose medications that go home based on HPVC anesthesia prep protocol.

HPVC Soft Tissue Surgery and Dentistry Preparation Medications (no charge package, charge individually) - Surgeon to prescribe either gabapentin, trazodone, alprazolam or a combination of them along with cerenia based on patient's condition and FAS level
